This item is printed on demand - Print on Demand Neuware - This work was an attempt to investigate the effect of addition of inorganic materials in nanoscale on the structural, optical and thermal properties of the polymer blends. With the addition of nanosized inorganic particles into polymer matrices the new composites material will exhibit unexpected properties, which greatly differ from that of conventional materials. So, it is a useful technique for designing materials with a wide variety of properties that may be used in different application. 116 pp. Englisch.
