Book Condition: New. Publisher/Verlag: Springer, Berlin | Damage Detection by Microscopy | Assessing the quality of textiles using textile microscopy remains one of the important instruments for permanent process improvement in the fiber, textile and apparel industries. The degree of international interlinking in the textile producing and finishing industries and their markets demands clearly defined and reproducible methods of detecting damage or defects at all process stages. This book -Quality Assessment of Textiles -Damage Detection by Microscopy - has in the meantime established itself so well as "the Mahall" in research institute laboratories investigating defects, in universities and colleges, in the training of textile chemists and technologists, and in the industry and the retail trade, that it has become necessary to bring out a new edition. This edition has been revised and supplemented by Mr. Mahall and his successor Ms. Irmhild Goebel and her staff. Cognis, as the successor organization continuing the textile business of the former Textile Technology department of Henkel, is pleased to make this new edition available to specialists, to students and to any other interested readers. June 2002 Dr. U. Kloubert (Cognis Deutschland GmbH & Co. KG) Prof E. Finnimore (Fachhochschule Hof, Germany) Foreword to the First Edition Quality is the decisive criterion by which textile industry is measured in the international competition.
