A HISTORY OF MODERN COMPUTING

MIT Press (MA). Paperback. Book Condition: New. Paperback. 459 pages. This engaging history covers modern computing from the development of the first electronic digital computer through the dot-com crash. The author concentrates on five key moments of transition: the transformation of the computer in the late 1940s from a specialized scientific instrument to a commercial product; the emergence of small systems in the late 1960s; the beginning of personal computing in the 1970s; the spread of networking after 1985; and,...
